Project Description

The City of Whitefish is planning to reconstruct Edgewood Place & Texas Avenue. The City has selected the engineering firm of Robert Peccia & Associates (RPA) to assist them with project management, public involvement, surveying and civil engineering. The project will generally include roadway reconstruction, a bicycle/pedestrian path, decorative street lighting and drainage improvements.

Project Overview:

The Edgewood & Texas Reconstruction Project will consist of reconstructing Texas Avenue from Edgewood Place to the northern city limits and Edgewood Place from Colorado Avenue to the eastern city limits. The total length of the project is approximately 5,650 linear feet. Construction schedules are yet to be determined, but summer 2021 construction is possible for a portion of the corridor.

Public Outreach & Involvement

Throughout the development of the project, there will be several public outreach campaigns and opportunities for public involvement. The best source of information for the public will be the City's website at:

<http://www.cityofwhitefish.org/523/Edgewood-and-Texas-Reconstruction-Project>

Informational newsletters and other information regarding the project will be posted to the website.

Current Work

Survey crews have already begun collecting the site data needed by the engineers to design the roadway corridor. Please keep a careful eye out for them when you are traveling along these roadways.

Communication is Key

We want to communicate with all property owners and residents within the vicinity of Edgewood Place and Texas Avenue corridors. E-mail is a great tool for distributing information. To be included in our e-mail distribution, please provide your name, address and e-mail address to btheis@rpa-kal.com or call 406-752-5025.
