RP was driving an Audi (bearing Montana). The Audi was parked near the middle of the lot, close to the south doors. The Audi was facing north. To the parkin gspot directly west of the Audi, Garner observed there was what appeared to be a gray Nissan with dark rims, ski rack and no front license plate. The vehicle pulls forward, turns right and side-swipes the Audi. Garner observed a female later get out, looks at the damage and drives away. Garner and were able to back track the vehicle and see what register the woman checked out on. attempted to retrieve the informaiton from the til; however, the did not have the credentials to access the information. said they would contat Garner later this week if they find identifiable information. ; PHONE CALL;
